

GiveChange

How to use the GiveChange labels

We suggest using the Avery® White Shipping Labels with TrueBlock® Technology 18163, 2" x 4". If Avery labels are not available, feel free to use labels with adhesive on the back to print the labels.

How to use the GiveChange social shareables

These shareables have been sized for Instagram, Facebook and Twitter. Save the photos on to your computer or mobile phone and upload them to your personal account. Be sure to include the hashtag #GiveChange!

I want a professional screen printer to print my GiveChange tshirts

This can easily be done by using the files located in the folder "Vector Files" (.EPS) in the Tshirt folder. If you send these print ready art files to your printer, they will be able to use these files to print your shirt for you. We highly recommend printing on a blue shirt with white print. Prices may vary depending on your local printer and quantity sizes.
